Profile

Martin Pick

*Chief Executive Officer
Executive Director*

Dr. Martin Pick, C Eng, FIM

Dr. Martin Pick is a chartered engineer, experienced manager and entrepreneur. He is currently serving as Director of MPC3 Limited (an engineering and innovation management consulting company) and SciViron Limited (a consulting and business facilitating company). Dr Pick has previously worked in senior management and leadership roles in large companies such as ICI Fibres plc as well as smaller companies such as Linear Composites Limited and Carl Stahl Limited. Dr. Pick's management experience includes roles as Managing Director, Business Development Manager, Customer Service and Quality Manager, Product Development Manager and Operations Manager. He has also served as consultant to Thomas Swan in connection to manufacturing processes for carbon nanotubes. Dr. Pick has extensive practical experience and deep insight into the manufacturing processes relating to fibres and textiles on one side and carbon nanotubes on the other.

Dr Pick holds a PhD from University of Cambridge where he specialized in polymers and materials science. He is named as an author on several peer-reviewed scientific publications and also articles in trade magazines. Dr Pick is also listed as an inventor on patents.
